MESSRS. SMITH, ELDER AND CO. beg to announce to their Constituents returning to Europe, and who may be desirous of appointing their Firm to act as their Agents for the receiving and remitting of their Furlough Pay and Allowances from the Council of India, that they can procure and execute the required Powers of Attorney in favour of Messrs. Smith, Elder and Co., previous to their Departure from India, upon application to their agents:—

Messrs. ROBINSON, BALFOUR AND CO. Calcutta.
 Messrs. PARRY AND CO. Madras.
 Messrs. SMITH, TAYLOR AND CO. Bombay.

The Certificates required previous to the issue of Furlough Pay and Allowances in England, are,—

Furlough Certificate, Service Certificate, No Demands Certificate, and Pay Certificate. A Pilot's Certificate is required of all Officers embarking at Calcutta, and Date of Departure from those embarking at Madras or Bombay.

Staff Officers, or Officers on Civil Employ, require a further Certificate, stating the amount they are entitled to receive while absent on Furlough.

THE FOLLOWING INSTRUCTIONS RESPECTING PASSPORTS MAY BE FOUND OF SERVICE:—

Passengers from India, China, Ceylon, Australia, &c., who purpose returning to England by the Continent should furnish themselves with a Passport from the Presidency, or Government, or British Consul, where they embark, and on arriving at Alexandria their first care should be to have the same *visé* by the Consul of the Country or State to which they intend to proceed.

Passengers who may embark from places where a Passport is not procurable, or who from press of time or want of information fail to provide themselves with that document, can readily obtain a Passport from the British Consulate at Alexandria, which must be afterwards *visé*, as above, by the Consul of the country for which they are about to embark. As most of the foreign Consulates are situated on the Grand Square, this can be done with very little trouble. The fees for a Passport and *visa* generally amount to about Nine Shillings.

Passengers proceeding by *Foreign Steamers* are usually called upon to deliver up their Passports at the office where they take their passage, and the same are returned to them, on application, by the local police authorities after arrival in port. Detailed instructions how to proceed in this case may be obtained from the Commander or Purser of the vessel. Passengers proceeding to Marseilles by the P. and O. Company's steamers deliver their Passports to the Purser on board, and receive them back at the Custom-house, where their baggage is examined. As these Passports are likely to be demanded on several occasions whilst travelling through France, Passengers will do well to have them always at hand. The same course cannot be too forcibly enjoined on those who travel *via* Trieste, and who intend visiting places in different Continental States, as strict attention to this simple advice will save them much of the annoyance frequently complained of.

Note.—One Passport will suffice for a family, but the members comprising it must be enumerated, and the servants likewise. Persons travelling singly, whether ladies or gentlemen, must each have a separate Passport.

Councillor, Penang, requests him to deduct from my pay, from the 24 Jan. 1865, Rs 36..10..0, instead of Rs 34..2..1, as heretofore, in consequence of my having completed 10 years' service on this date - viz 24 Jan. 1865.

Letter from Rev. R. Bland - Chena Poonjee 28. Oct: 59

I have written to Col. Jenkins, supreme ruler of the North
East Frontier, touching your letter. In case of leaving Penang
should from experience advise you to endeavour to obtain
an appointment within his dominions, or at least on the
Frontier - I think you should apply to the superintending
Magistrate at Dacca - Gowhaty itself is likely to be vacant -
then there are Dibrugarh, Chena, Sylhet, Cachar, and
Jiphrah -

Journey to Calcutta

On the morning of Tuesday May 29: 1855 I left
62 St. Russell St. Bloomsbury, where I had been
staying with Chaplin the House Surgeon to the
Bloomsbury Dispensary, and started in a cab for
the Shadwell basin of the London Docks, where
the "Lyonesse" 743 tons burden, A.1 Lloyd's for 13 yrs
and now about 6 yrs old, was lying - & this ship
my passage had been taken for £42. - 20 guineas
having been remitted in consideration of my
services as surgeon.

Chaplin accompanied me on board. When we were
presently joined by Mr Cabel, a friend of his who
lodged in the same house: My fellow passenger
Mr Hughes was already on board accompanied by
2 sisters, a Mother, and Mother-in-law: At 11 A.M.
we cleared out of the basin, and found a steam
tug awaiting us, which immediately took us in
tow, and down the river we went just before
high tide, - on our way we saw Scott Russell's
ship yard, with the commencement of the monster
ship, and the remains of the floating battery
which had been recently burnt, - off Woolwich
we saw another floating battery the "Meteor"
and at 2 P.M. we went to dinner - Capt
Robinson, the ship's Husband was on board, and
cared for us, there was also the Custom house

officer, and every one except the captain, who
 remained behind to finish some business connected
 with the ship's papers: He came on board at Gravesend,
 after we had been there about an hour and $\frac{1}{2}$, and
 we once more steamed down the river. At Gravesend
 our friends left us, and we were at last separated
 from all old ties and fairly entered on our
 new life on board ship. - To amuse myself I made
 my bed that night, and after a hearty tea, the
 last by the bye that I eat for 12 days I went
 early to bed, - We anchored twice in the night
 because there was not water enough to allow us
 to cross certain banks, as we drew 10 ft. 10 in
 water at sea, having been 19 ft 2 in deep in dock.
 There was a good deal of rolling in the night, and
 when the captain called me at 4 A. M. the next
 morning to say that the Pilot was going ashore, and
 ask if I had any letters to send, I did not feel
 inclined to turn out: about 7 the Pilot went on
 shore at Deal, and away we went past Dover,
 Hastings, Beachy head, & Brighton about 8 $\frac{1}{2}$, but it
 was too hazy to see any thing but a dim
 outline of the shore.

The bottles were produced the first evening, and
 in the night my bookshelf tumbled down with my
 pile of syrup in it. & the Soda and Tartaric Acid, but
 luckily nothing was broken.

This I got fixed up again the next morning more securely - wind N.E.

We continued to have fair but light wind, and pretty smooth water, till the ~~Thursday~~ ^{Friday} after we started when the wind had shifted so much to the West that we were compelled to back. on Saturday night the wind freshened, and on Sunday it was blowing hard, and quite rough. -

Monday June 4

The wind when I awoke having been pretty well tossed about in the night I found that it was blowing a gale from the West. it soon moderated however, ~~and~~ but I kept my cot all day. soon after this (2 or 3 days) we had again a favourable wind which took us right into the Trade, which continued to 9° of north latitude where we were becalmed.

On June 19

We were under the sun being in

14 Saturday July 21

Caught a shark. - Calm.

Sunday, July 22 - Fine service - Meeze sprung up from
N. E. freshened, and in the night we beat 8 knots

Friday July 27.

The wind had been freshening up for 2 days from the
N. E. accompanied by abundance of rain as is
always the case when it is from that quarter, and
we had shipped so much water that we had become
quite accustomed to the sound of seas breaking
over the bulwarks on to the deck, so at 8 1/2 A. M. I
lay in my cot after having awoken finding all attempts
to go to sleep again unavailing from the noise of the
water on the decks, the creaking of the mast, the jarring of
the window weights &c; when all at once a heavier sea
than usual broke over us, and the cabin door being
unlatched ^{in the night} open, it came to the extent of some 20 buckets or
more as the steward who had the brailing of it out
estimated it; swinging in my cot, some 3 feet above
the floor I did not fear getting wet, as it rushed past
my cabin door which was partially open like a mill
race, (the ship lying over on my side on that tack)
As soon however as she ^{rolled} ~~heeled~~ over I perceived as I
looked over the edge of my cot that a considerable quantity
(som 4 or 5 buckets were sent baled out) had effected
an entrance over the side of the door which is about
5 ft high. - I jumped out of bed all standing, on the

1855

work of an instant, and I hastily effected the rescue of my shoes which were floating about, before they had turned over and become filled: The next thing was to remove everything that stood on the floor, which I ^{to the only place} ~~accomplished~~ ^{accomplished} with the help of Mr. Brants.

At breakfast we held a consultation, the result of which was the packing up of the door entirely by nailing strong pieces of wood across it, and bracing in one of the ladders which lead out to prop which we placed against the after skylight, ~~and~~ ^{by} through which ~~which~~ ^{the} was the only entrance to the Cuddy for the next month.

^{Tuesday} Monday, July ³¹ 20 ~~20~~ The wind blowing strong from the S.W. and bitterly cold. - Not much sleep. My cot banging from side to side against the bulkheads all night. The captain while sound asleep in the middle of the night was thrown out of bed to the other side of his cabin, with all his bed clothes & bedding &c. but was luckily not much hurt, this is the second time he has been moved the same way the former time being in the galley in the chop of the channel.

Thursday August 2. The cold moor abate with Mr. Hughes sick. Keeping his bed.

Sunday July 29

Sighted "Inaccessible" Island about 12: A.M. and Passed "L'Isle d'Adunha" at 12 P.M. about 4 or 5 miles off: We fired off 2 blue lights & 2 rockets but no answering signals were made:

Friday August 3^d

The ship had been rolling in magnificent style all day, but about 4 P.M. she gave one or two extra deep lurches and all of a sudden, the Lascars' gally parted from its lashing, and brought away with it a great part of the ^{who} belonks - The Lascar cook & his mate were occupying their usual position, one on either side of the fire; they were thrown out, and overwhelmed with the Pots, & their contents (for it was just tea time) as well as the fire and the whole of the bricks and mortar of which the fire place is built, but escaped with a few slight bruises & for a few moments the spot was rendered invisible, being ~~covered~~ enveloped in clouds of steam. When they cleared away, the ~~destruction~~ ^{destruction} was lamentable a heavy spar behind the Cabine had broken from its place, and acting as an enormous flail had stove in the side of a large cask in which the supply of salt pork is kept, as well as two or three casks at its without breaking them; The main deck was at the same time deluged with water.

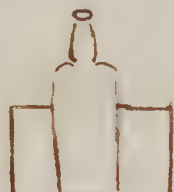

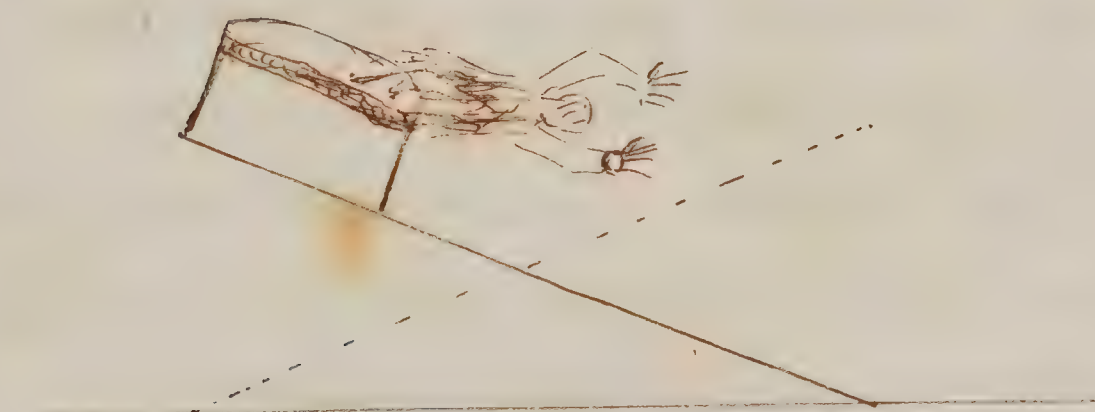

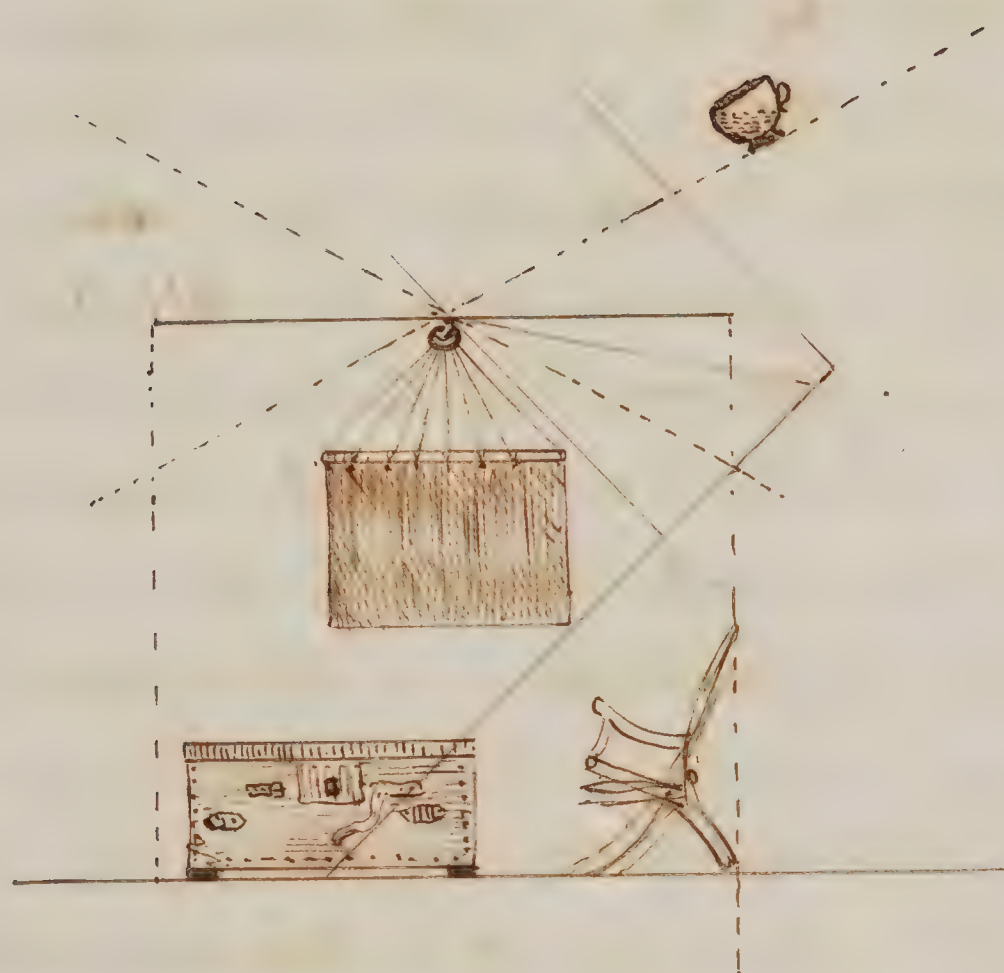

The same day the remaining pig died.

Saturday 4th

The rolling continues; an empty bottle placed in the rack which it is in deep ~~place~~ flew over to the floor and smashed.

My basin will not hold 2 pints and it is 4 in. deep

The only resource is a swinging tray

August 1855

Talk of a man requiring the whole road to walk on
he would here want a place of at least 6 ft.

Sunday August 12th

Wednesday Aug. 8. The Steward takes to his bed, - Stove up

Thursday -- I moved him to the upper cabin

Boiler falls from the top of the ^{main} yard when in an
extra heavy roll we carry away the ^{main} top of the mast

Friday morning 8 A.M. have on board the mortal remains of
"Gellaa", one of the Lascars who died about 12 P.M. the
funeral right: made some cakes. - Stove up

Saturday 11 got the words of the "Boatswain" from
Hindback

Sunday Aug. 20 19

The steward keeps his bed but progresses well.
he had Pleuritis of right side where there was old
in chief, and rheumatism for the first time in his
life of left ankle, & Right Knee & ankle. eat our last part

Thursday 16 The captain who has never been thoroughly
well since we left London put himself under my care.
his most prominent symptom is vomiting every
morning on getting out of bed.

Saturday 18 Captain very unwell, gave him
an emetic in the afternoon. - Some day a
strong wind from the N.E.; the ship had a good deal of
water which ^{some of} about 11 1/2 P.M. found its way into my
cabin through the midshipmen's berth, and completely
flooded it, rendering it necessary to remove everything

August 1857

19

that stood on the floor, then and then into the after cabin myself poorly could not eat. —

Wednesday Aug. 22

Captain continues very unwell — at dinner at 2 1/2 P.M. we were struck by a very heavy squall from the N. — the day having been very thick with quantities of rain. This carried away in an instant the main top ^{55 ft by 14 in.} sail yard and the fore ^{65 ft by 16 in.} sail yard. after which the wind freshened up to a regular gale. — S

Saturday Aug 25

The carpenter has finished the new main top sail yard but it cannot be got up on account of the violence of the gale which we are running before under —
Four topsail & brizen topsail

Friday night Aug 24 A heavy sea broke into the Port after cabin when the steward is lying, and consequently obliged at 4 P.M. to remove everything out of it.

Saturday Aug 25 As I was talking to Mr. Hughes my fellow Passenger about 8 1/2 P.M. a heavy sea struck the starboard quarter, and carried away the pig to wheel one of the midshipmen was holding on. it then broke 3 panes of the after skylight, and descended wholesale into the cabin, filling his cabin, and getting into every cabin in the ship. —

The observations from which this table has been compiled, were made with first-rate instruments, and may therefore be relied upon. Highest temperature registered throughout the year 87°. 8; lowest 74. 0. The sun was vertical during the year on April 5, and September 8. In April, the mean temperature of the month was higher than in the three preceding months, or in May; but June was the hottest month of the year. The rainy season in Penang commences towards the end of August, and the mean temperature fell steadily from June to October, when from the large quantity of rain it was unusually low. The first seven months of 1859, during which the rainfall was not noted, were very dry; but more rain fell in October than the oldest inhabitant remembers to have seen in one month, and on the whole, the rain that fell in the rainy months was probably beyond the average. 1859 was free from epidemics among the population, and not a single case of cholera occurred, though it carried off numerous victims in the two preceding years. But a murrain among the buffaloes, bullocks, pigs and even poultry, destroyed these animals in large numbers. The cattle in Penang and Province Wellesley have been visited by a murrain from time to time, but during the last year it was more general, more fatal, and lasted longer than has ever been known before. No accurate account of the value of the animals killed by this disease can be obtained, but it is probably over \$ 100,000.

less than 10 deg. lower than that of plain as above. mean temp. of year 80.6
